

ADMINISTERED BY NAMM

## **This is to confirm**

### **Requires industry standards of memorial fixing in compliance with BS8415**

And acknowledges the Register of Qualified Memorial Fixers (RQMF) which is an independent register administered by The National Association of Memorial Masons (NAMM).

The RQMF assists Burial Authorities to verify that memorial fixers are suitably qualified and have appropriate valid insurance cover in place. All those listed on the RQMF must agree to work in accordance with the current NAMM Code of Working Practice to achieve the required standards of memorial fixing as stated in the current British Standard BS8415 and to provide a guarantee of conformity of compliance to those standards.

All RQMF registered fixers and Memorial Masonry Companies have signed an undertaking to abide by the decisions of an independent disciplinary committee formed to oversee any alleged breach of fixing standards made against them.

GDPR compliance ensures RQMF registered fixers personal details are only accessible to Burial Ground operators who have free online access to the RQMF data base via an individual login.

More information about the RQMF at [www.rqmf.org.uk](http://www.rqmf.org.uk)

**Note: Registration with the RQMF alone does not validate any claim to NAMM membership.**
